

# Ruth Wageman

Ruth Wageman is one of the foremost scholars studying and working with teams, especially leadership teams. Ruth's research, teaching, and practice are focused on the conditions that influence superb team performance. Ruth especially focuses on teams whose purpose is to solve complex problems and lead system transformation. She builds collaborative leadership capacity within and across organizations, especially with multi-sector leadership teams working to transform health and society. Ruth has been a professor at Columbia, Dartmouth, and Harvard, where she has led many original research programs. Ruth wrote "Senior Leadership Teams: What it Takes to Make them Great," (HBS Press) with Deb Nunes, Jim Burruss, and Richard Hackman, as well as many seminal peer-reviewed articles. Ruth designed the Team Diagnostic Survey with Richard Hackman and Erin Lehman. TDS is a powerful, well-validated assessment that measures how well the six conditions that drive effectiveness are established for a team; she also leads accreditation workshops and teaches team development professionals how to use the instrument in their practice.
